SUBJECT INDEX

Abdomen, trauma, gastrointestinal symptoms and jejunostomy feeding after (abstract), 80
Aging, physiologic changes, nutritional status and, 8
AIDS
  malnutrition
    nutritional support in, 63
    role of gastrointestinal pathology, 43
  refeeding, subsequent growth, pediatric patient, 54
Alzheimer's disease, new nutritional supplement for (abstract), 263
Amino acids, branched-chain, plasma cholesterol and, sepsis (abstract), 172
A.S.P.E.N.
  committee reports, 89, 128
  new members, 91, 131, 180, 220
  standards of practice, nutrition support dietitians, 74
A.S.P.E.N. News, 84, 126, 176, 266
A.S.P.E.N. PENline, 35

Bone marrow
  allogeneic transplantation, nutrition-related problems (abstract), 258
  transplantation
    hepatic complications, total parenteral nutrition, 18
    total parenteral nutrition (abstract), 264
Bowel function, fiber measurement and, commercially available enteral formulas, 247
Brain injury, nutritional requirements, 68

Calendar of Events, 37, 93, 133, 182, 222, 270
Calorimetry, indirect, evaluation, critically ill patients (abstract), 259
Cancer, home parenteral nutrition outcome in patients with, 59
Cancer surgery, nutritional assessment methods, prognostic ability (abstract), 81
Catheter
  central venous
    microbial colonization (abstract), 81
    sepsis from infusate contamination, 156
Cholesterol, plasma level, related to doses of branch-chain amino acids, sepsis (abstract), 172
Cirrhosis, malnutrition with, effect of total enteral nutrition (abstract), 169
Contamination, enteral feedings, decanting as source of (abstract), 259
Current Literature, 30, 79, 123, 169, 217, 258

Dextrose, absorbed during peritoneal dialysis, overfeeding resulting from (abstract), 123
Dialysis, peritoneal, dextrose absorption, overfeeding and (abstracts), 123, 173
Diarrhea, isotonic nasogastric tube feedings and (abstract), 80
Diet, predigested, therapeutic applications, 241
Dietitian, role, home enteral feeding (abstract), 261
Discipline Committee Reports, 87, 178, 269

Editorial
  Fiber-containing enteral formulas: Clinical importance, 97
  Nutrition and immunology: Challenge for the 1990s
  Nutrition support in obstetric patients, 138
  Peptides in clinical perspective, 225
  Protein-energy malnutrition in AIDS, 41
  The challenges of feeding the elderly, 6
Elemental diet, nitrogen source, 227
Energy, metabolism, in acute and chronic liver disease (abstract), 169
Energy expenditure
  measurement, severe head trauma (abstract), 172
  resting, comparison, predictive formulae (abstract), 170
Enteral formula
  contamination, decanting as source of (abstract), 259
  dilution, calculation methods, letter, 4
  fiber and bowel function measures, 247
  peptide-based, physiologic effects, 231
  powdered diet, dilution of, letter, 137
  stress ulceration prevented by (abstract), 260
Enteral nutrition
  access device selection, 207
  home
    dietitian role (abstract), 261
    magnesium deficiency (abstract), 258
  long-term, formulae shortcomings, pediatric patients, 160
  potential application of dietary fiber, 99
  total, effect on short-term outcome, severely malnourished cirrhotics (abstract), 169
  treatment of hyperemesis gravidarum, 153

Fat
  emulsion, intravenous, plasma clearance, acute bacterial infection (abstract), 31
  intolerance, measurement, during total parenteral nutrition (abstract), 259
  metabolite, surgery and nutritional regimen effect (abstract), 263
Feeding tube
  clogging, new design for reduction of, 107
  nasoenteral, pulmonary complications, ICU (abstract), 30
  nasogastric, isotonic, diarrhea and (abstract), 80
  placement, role of pH measurement (abstract), 32
Fiber
  dietary, application to enteral nutrition, 99
  measurement, commercially available enteral formulas, 247

Gastrointestinal tract, pathology, role in malnutrition, AIDS patients, 43
Geriatrics, hypophagia among hospitalized patients (abstract), 171
Glucose, intravenous infusion, metabolic and cardiovascular effects (abstract), 32

Head trauma, energy expenditure measurement (abstract), 172
Hospital cost, nutrition support services, billing changes (abstract), 262
Hyperalimentation, enteral, source of nosocomial infection (abstract), 218
Hyperemesis gravidarum, enteral nutrition in treatment of, 153
Hyperglycemia, refeeding-related, management of, 23
Hyperkalemia, refeeding-associated, management of, 23
Hypocalcemia, refeeding-associated, management of, 23
Hypokalemia, refeeding-related, management of, 23
Hypomagnesemia, refeeding-associated, management of, 23
Hypophagia, among hospitalized elderly (abstract), 171
Hypophosphatemia, refeeding-associated, management of, 23

Immune function
  nutrition and, literature, 200
  nutrition role, 189
Infection
  bacterial, plasma clearance of intravenous fat emulsion in (abstract), 31

central venous catheter-related, source and route (abstract), 81
nosocomial, enteral hyperalimentation as source of (abstract), 218
Infusate, contamination, catheter sepsis from, 156
Insulin, adsorption to parenteral infusion systems, case report and literature review, 111
Intralipid, intravenous infusion, metabolic and cardiovascular effects (abstract), 32
Intravenous solution, peripheral administration, utilization (abstract), 171

Jejunostomy feeding
after abdominal trauma, gastrointestinal symptoms (abstract), 80
after complicated pancreatitis, 14

Letters to the Editor, 4, 137
Lipoperoxidation, vitamin E deficiency and, adult respiratory distress syndrome (abstracts), 123, 173
Lipoproteins, plasma, surgery and nutritional regimen effect (abstract), 263
Liver
disease, energy metabolism in patients with (abstract), 169
resection, protein supplementation in patient with, 251
veno-occlusive disease, total parenteral nutrition in bone marrow transplant patient with, 18

Magnesium, deficiency, home enteral nutrition (abstract), 258
Malnutrition
nutritional support, AIDS patient, 63
role of gastrointestinal pathology, AIDS patients, 43
total enteral nutrition effect, severely malnourished cirrhotics (abstract), 169
Metabolism, measurement, critically ill patients (abstract), 259
Microcirculation, intestinal, effect of peptide-based diets, rat, 238

New Products, 34, 83, 125, 175, 219, 265
Nitrogen, elemental diets, 227
Nutrition
immune function and, 189
literature related to, 200
intravenous, central versus peripheral, perioperative period (abstract), 79
problems, allogeneic marrow transplant patients (abstract), 258
Nutritional assessment
Parkinson's disease, 196
prognostic ability, surgical cancer patients (abstract), 81
Nutritional regimen, effect on plasma lipoproteins and fat metabolites (abstract), 263
Nutritional status
physiologic aging and, 8
postsurgical patients at home (abstract), 217
visceral proteins and, chronic and acute stress (abstract), 30
Nutritional supplement, evaluation, Alzheimer's disease (abstract), 263
Nutritional support
AIDS patient, case report, 63
hospital billing changes (abstract), 262
peripheral, utilization (abstract), 171
Nutrition News, 185

Overfeeding, dextrose-associated, peritoneal dialysis patients (abstracts), 123, 173

Pancreatitis, complicated, postoperative jejunal feedings after, 14
Parenteral nutrition
catheter, microbial colonization (abstract), 81
cyclic total, clinical techniques, 163
home, outcome, cancer and noncancer patients, 59
peripheral, phlebitis incidence (abstract), 79
safety and effectiveness, obstetric patients, 139
total
bone marrow transplant patients (abstract), 264
bone marrow transplant patient with hepatic complications, 18
fat intolerance, plasma turbidity measurement (abstract), 259
insulin adsorption to infusion system, 111
total peripheral, three-in-one admixture, clinical experience, 118
Parkinson's disease, nutritional aspects and swallowing function, 196
Patient, weight, scale accuracy, testing and screening methods, 254
Pediatrics
AIDS, refeeding and subsequent growth, 54
long-term enteral feeding, shortcomings of current formulae, 160
Peptide
-based enteral formulas
effect on intestinal microcirculation, rat, 238
physiologic effects, 231
pH, measurement, feeding tube placement predicted by (abstract), 32
Phlebitis, incidence, peripheral parenteral nutrition (abstract), 79
Pregnancy
hyperemesis gravidarum, enteral nutrition in treatment of, 153
parenteral nutrition during, 139
Protein
restriction, renal insufficiency and (abstract), 217
supplementation, hepatic resection patient, 251
visceral, nutritional status and, chronic and acute stress (abstract), 30
Public Policy Forum
Background of federal health policy environment, 166
Federal involvement in clinical nutrition, 214

Rebound hypoglycemia, refeeding-related, management of, 23
Refeeding
growth following, child with AIDS, 54
management of complications associated with, 23
Renal insufficiency, effect of protein restriction (abstract), 217
Respiratory distress syndrome, adult, vitamin E deficiency and lipoperoxidation during (abstract), 123, 173

Selenium, homeostasis, acute illness effects (abstract), 261
Sepsis, branch-chain amino acid therapy, plasma cholesterol related to (abstract), 172
Skeletal muscle, function measurement, preoperative patients (abstract), 31
Stress
relationship of visceral proteins to nutritional status in patients with (abstract), 30
ulceration, prevention by enteral nutrients (abstract), 260
Surgical wounds, nutritional status of patients at home with (abstract), 217
Swallowing, Parkinson's disease, 196

Vitamin E
deficiency
adult respiratory distress syndrome (abstract), 173
lipoperoxidation and, during adult respiratory distress syndrome (abstract), 123

Washington Review, 1, 39, 95, 135, 183, 223
